EDUCATION

Vellore Institute of Technology

Computer Science and Engineering B.tech
CGPA: 8.88

Vellore, India

2021 - 2025

Adarsh Jain Dharmic Shiksha Sadan

PCM 12th
Percentage: 86%

New Delhi, India

2020 - 2021

EXPERIENCE

Strategyz Inc. | Software Developer

Gurgaon, India | Mar 2024 - Present

- Streamlined workflows by creating SharePoint automation tools for real-time alerts, reducing manual follow-ups by 40%.
- Integrated RESTful authentication APIs, lowering login failures by 15% and enhancing access reliability.
- Engineered backend services on AWS (S3, EC2, Lambda, DynamoDB), achieving 99.9% uptime and cutting infrastructure costs by 30%.
- Directed Microsoft 365 migration and domain defederation for 100+ users, ensuring zero downtime.
- Established CI/CD pipelines with GitHub Actions, accelerating deployment by 65%.

Axlrte Research | Data Science Intern

Bengaluru, India | Sept 2023 - Dec 2023

- Applied machine learning and analytics to uncover performance trends, boosting operational efficiency by 15%.
- Refined predictive models for customer behavior forecasting, reducing analysis time by 30%.

Alphabet Inc. | Process Developer

Gurgaon, India | Nov 2021 - May 2022

- Automated HR workflows, cutting manual tasks by 35% and speeding up request handling.
- Developed onboarding automation scripts, improving processing time by 20% and simplifying cross-platform operations.

SKILLS

Programming Languages: Java, Python, Javascript, HTML, CSS
Libraries/Frameworks: React, Next, Node, Express, Tailwind Css, Bootstrap
Tools / Platforms: Git, Github, Vercel, Netlify, AWS, Google Cloud Console, Rest APIs
Databases: SQL, MongoDB, DynamoDB

PROJECTS / OPEN-SOURCE

AutoBlog Scale Infra | Link

Python, Django, AWS, JSON

- Architected a secure, fault-tolerant blog application infrastructure on AWS using VPC, ALB, and Auto Scaling Groups across multiple AZs, ensuring high availability and zero single points of failure.
- Automated media processing by triggering AWS Lambda functions on S3 upload events to index objects into DynamoDB, streamlining data pipeline efficiency.
- Enhanced application security and performance by implementing CloudFront CDN with Route 53 failover routing and ACM-secured HTTPS connections across all traffic layers.

Ware2Go | Link

React, Vite, Google Maps API, Gemini API, Node.js

- Created a responsive logistics interface using React and Vite, integrating Google Maps API and Gemini AI for route optimization, reducing delivery distance by 25% in simulations.
- Enabled real-time, AI-assisted routing with dynamic UI updates, improving simulated order fulfillment speed by 30% over baseline models.
- Preparing Spring Boot backend migration to enable scalable order processing, RESTful APIs, and future integration of predictive analytics and a mobile-first interface.

CERTIFICATIONS

- AWS APAC - Solutions Architecture - **Forage**
- Microsoft Technology Associate - **Microsoft**
- AWS Cloud Foundations - **AWS**
- Google: Data Analytics - **Google**
- Google: Project Management - **Google**

HONORS & AWARDS

- Got the High Flyer Award for outstanding performance, initiative, and high leadership potential.
- Earned the "Discord Developer" title from Discord for building multiple custom automation bots on Discord.
- Winning Team of the Last Hunt Hackathon organized by the Institute.
